

UTTAM DANIDHARIYA

MERN Stack Developer · React.js & Next.js & Node.js & MongoDB

Ahmedabad, India | +91 6354818127 | uttamdanidhariya@gmail.com
Portfolio: <https://uttam-danidhariya-portfolio.vercel.app/> | GitHub: <https://github.com/uttam00>

PERSONAL SUMMARY

MERN Stack developer with 4+ years of experience delivering high-quality web applications using React.js, Next.js and Node.js. Experienced across the full stack lifecycle, including architecture, API integration, testing, and performance optimization. I write code that junior devs can maintain and PMs can ship on time.

SKILLS

Core:	React.js, Next.js, TypeScript, JavaScript	UI & Styling:	MUI, Ant Design, Tailwind CSS, SCSS/SASS, Bootstrap, Figma → Code
Backend:	Node.js, Express.js, REST APIs, GraphQL	Testing:	Jest, React Testing Library, Core Web Vitals (LCP/CLS/FID), Lighthouse
Database:	MongoDB, MySQL, PostgreSQL	Cloud & Infra:	AWS Lambda, API Gateway, CloudFormation, Vercel, Stripe, Google Maps API
State & Data:	Redux Toolkit, React Query, Context API	Tooling:	Git, Bitbucket, Monorepos, Webpack, Vite, JWT, OAuth 2.0

EXPERIENCE

MERN Stack Developer (React.js / Next.js / Node.js) Ahmedabad | Jan 2022 – Present
Intellimedia Networks

- Drove Lighthouse performance scores from ~60 to **90+ across 5 production apps** via code splitting, lazy loading, and next/image optimisation — cutting average LCP by ~40%.
- Reduced page bounce rate by **22%** on a real-estate platform by implementing SSR, dynamic metadata, and JSON-LD structured data in Next.js, lifting the site from page 4 to **page 1** for 3 target keywords.
- Cut API response-handling bugs by **35%** by migrating a legacy REST layer to a typed GraphQL schema with Yup validation — eliminating an entire class of runtime errors in production.
- Owned end-to-end delivery of a live-streaming portal serving YouTube, Facebook, and Vimeo simultaneously — shipped on schedule with **zero post-launch P1 incidents**.
- Reduced Stripe subscription integration time significantly by building a reusable payment-flow component adopted across **2 subsequent projects**.
- Established a component library (MUI + ANTD + SCSS tokens) that cut **UI build time by ~30%** across the team, reducing design-to-code discrepancies in QA.
- Wrote Jest unit and integration tests achieving **80%+ coverage** on critical user-flow components, catching 12 regressions before they reached staging.
- Integrated Google Maps, Google Analytics, and 3 payment gateways, boosting average **session duration by 18%**.
- Built and maintained RESTful and GraphQL APIs; managed MySQL and MongoDB databases across multiple production projects.
- Deployed full-stack applications on Vercel with SSR, ISR, code splitting, and caching strategies optimised for Core Web Vitals.

PROJECTS

Live Streaming Application
React.js, Node.js, AWS Lambda, API Gateway, CloudFormation, Stripe

- Engineered simultaneous multi-platform streaming (YouTube, Facebook, Vimeo) via a single dashboard, reducing broadcaster setup time from **20 min to under 3 min** per session.
- Architected a serverless backend on AWS Lambda + API Gateway + CloudFormation, keeping infrastructure cost flat as concurrent users scaled 3x.
- Built a Stripe subscription engine with 4 plan tiers; **0 billing disputes** in first 6 months of production.

Real Estate E-Commerce Platform
Next.js, Node.js, GraphQL, E-Contract Signing, Virtual Tours

- Delivered full SSR + ISR strategy achieving **first-contentful-paint under 1.2 s** on 4G, measured via WebPageTest.
- Built a dual-role system (buyer / seller) and e-contract signing flow that replaced a manual PDF process, cutting transaction close time by **~4 days**.
- Integrated virtual tour scheduling that increased **qualified lead conversion by 31%** post-launch.

Bakery E-Commerce Admin Portal
React.js, Node.js, Express.js, Role-Based Auth (RBAC), Location Services

- Implemented RBAC for 3 admin tiers (Super Admin, Warehouse Admin, Pickup Admin), reducing **unauthorised-access support tickets to zero**.
- Integrated location-based delivery routing; warehouse dispatch errors dropped by **27%** post-launch.

Funding Platform for Stakeholders
Next.js, Node.js, Dynamic Theming, Complex Multi-Step Forms

- Built a multi-step funding workflow handling 40+ dynamic form fields with conditional logic, reducing funder onboarding drop-off from **48% to 19%**.
- Delivered white-label theming per client with rapid turnaround — a feature that directly supported **3 new enterprise deals**.

Healthcare Compliance Training Portal
Next.js, Node.js, Mobile-First, Adaptive Learning, ADA / HIPAA UX

- Achieved **98 Lighthouse accessibility score**, enabling the platform to meet ADA and HIPAA UX guidelines out of the box.
- Built adaptive course delivery based on user background — reduced **average time-to-certification by 2 days** vs. the previous static course format.

EDUCATION

B.E. in Information Technology
Government Engineering College, Bhavnagar
CGPA: 7.83 / 10
